This text is inside a `p` element. The border, padding, and margins for this paragraph should line up with the boundaries denoted in the image below. There should be no top or bottom margin, the images above and below should be flush with this paragraph. Internet Explorer 4.0 appears to ignore the `width` property on this element. Internet Explorer 5.0 beta 1 detects the `width`, but applies it **incorrectly**.

THE BEAUTY OF CSS-BASED DESIGN

A demonstration of what can be accomplished visually through CSS-based design.

Welcome to the Zen Garden.

So what is this about?

There is clearly a need for CSS to be taken seriously by graphic artists. The Zen Garden aims to excite, inspire, and encourage participation. To begin, view some of the existing designs in the list. Clicking on any one will load the style sheet into this very page. The code remains the same, the only thing that has changed is the external .css file. Yes, really.

The Road to Enlightenment
Littering a dark and dreary road lay the past relics of browser-specific tags, incompatible DOMs, and broken CSS support.

Today, we must clear the mind of past practices. Web enlightenment has been achieved thanks to the tireless efforts of folk like the W3C, WaSP and the major browser creators.

The css Zen Garden invites you to relax and meditate on the important lessons of the masters. Begin to see with clarity. Learn to use the (yet to be) time-honored techniques in new and invigorating fashion. Become one with the web.

So What Is This About?
There is clearly a need for CSS to be taken seriously by graphic artists. The Zen Garden aims to excite, inspire, and encourage participation. To begin, view some of the existing designs in the list. CSS allows complete and total control over the style of a hypertext document. The only way this can be illustrated in a way that gets people excited is by demonstrating what it can truly be, once the reins are placed in the hands of those able to create beauty from structure. To date, most examples of neat tricks and hacks have been demonstrated by structurists and coders. Designers have yet to make their mark. This is an appropriate time to do so.

Littering A Dark And Dreary Road Lay The Past Relics Of Browser-Specific Tags, Incompatible DOMs, And Broken CSS Support.

Today, We Must Clear The Mind Of Past Practices. Web Enlightenment Has Been Achieved Thanks To The Tireless Efforts Of Folk Like The W3C, WaSP And The Major Browser Creators.

The Osz Zen Garden Invites You To Relax And Meditate On The Important Lessons Of The Masters. Begin To See With Clarity. Learn To Use The (Yet To Be) Time-Honored Techniques In New And Invigorating Fashion. Become One With The Web.

So What's This About?
There is clearly a need for CSS to be taken seriously by graphic artists. The Zen Garden aims to excite, inspire, and encourage participation. To begin, view some of the existing designs in the list. Clicking on any one will load the style sheet into this very page. The code remains the same, the only thing that has changed is the external .css file. Yes, really.

CSS allows complete and total control over the style of a hypertext document. The only way this can be illustrated in a way that gets people excited is by demonstrating what it can truly be, once the reins are placed in the hands of those able to create beauty from structure. To date, most examples of neat tricks and hacks have been demonstrated by structurists and coders. Designers have yet to make their mark. This needs to change.

Participation
Graphic artists only please. You are modifying this page, so strong CSS skills are necessary, but the example files are commented well enough that even CSS novices can use them as starting points. Please see the CSS Resource Guide for advanced tutorials and tips on working with CSS.

You may modify the style sheet in any way you wish, but not the HTML. This may seem daunting at first if you've never worked this way before, but follow the listed links to learn more, and use the sample files as a guide.

Download the sample html file and css file to work on a copy locally. Once you have completed your masterpiece (and please, don't submit half-finished work) upload your .css file to a web server under your control. Send us a link to the file and if we choose to use it, we will spider the associated images. Final submissions will be placed on our server.

Benefits
Why participate? For recognition, inspiration, and a resource we can all refer to when making the case for CSS-based design. This is sorely needed, even today. More and more major sites are taking the leap, but not enough have. One day this gallery will be a historical curiosity; that day is not today.

Requirements
We would like your submission to be browser-compatible on current web browsers (Netscape, Explorer, etc.).

Unfortunately, browsers display the same page differently, so one leads to the other to test your code across clients like Netscape and Mozilla.

We ask that you use CSS to produce a design that is simple, not too big, not too small, not too slow, not too fast, not too fancy, not too simple, not too simple.

This is a learning experience, and not everyone will be identical to the others. Bandwidth gets caught up in the mix. It's not easy to know what you've done.

The Beauty of Chicken Farming

The Road to Enlightenment

Littering a dark and dreary road lay the past relics of fattening nutrition, unbearably small cages, and thin-shelled eggs.

Today, we must clear the mind of past practices. Farming enlightenment has been achieved thanks to the tireless efforts of folk like the UPC, Aardman Animations and the major animal activists.

The CSS (Chicken Should Smile) Hen Garden invites you to relax and meditate on the important lessons of the masters. Begin to see with clarity. Learn to use the (yet to be) time-honored techniques in new and invigorating fashion. Become one with the chicken.

So What is This About?

There is clearly a need for chickens to be taken seriously by the farming industry. A demonstration of what can be accomplished through chicken friendly farming. Select any farm from the list to learn by example.

BIENE 2006: Ein Drittel fliegt weiter

127 von 376 Webseiten haben sich für die Feintests der BIENE 2006 beworben. Sie konnten die Testvorgaben der Aktion Mensch und der Stiftung Digitale Chancen einhalten. Noch nicht zugänglich sind derzeit aber die besten deutschsprachigen barrierefreien Webseiten von den außerdem vertretenen Institutionen.

Viva la Evolucion!
Ist die Zeit komplexer Richtlinien, die alles bis ins kleinste Detail regeln wollen, vorbei?
Die Prinzipien:
(der WCAG 2)

1. Content must be **perceivable**
2. Interface elements in the content must be **operable**
3. Content and controls must be **understandable**
4. Content must be **robust** enough to work with current and future Web technologies
